

Arithmetic (Addition & Subtraction)

● Hard Level (Higher Thinking)

1 Word Problems (Thinking & Understanding)

Addition (sums 18 or less)

Grade 1 Word Problems Worksheet

Chef Jennifer works at the school cafeteria.

1. There are 6 chef assistants and 2 servers. How many staff are working there?
2. In the fridge, there are 4 stacks of chocolate puddings, 7 stacks of brownies and 5 stacks of pasta salad. How many stacks of dessert are there?
3. There are 9 pots of cream of mushroom and 8 pots of vegetable soup. How many pots of soup are there?

Substitute numbers for candies and solve examples

	=20		=17		=12		=4
---	-----	---	-----	---	-----	---	----

	+		-		-		+		=	
	:		+		-		+		=	
	+		+		-		+		=	

4

◆ What are Word Problems?

Word problems are **math stories**.

We must:

1. Read carefully 📖
 2. Understand what is happening 😊
 3. Choose + or –
 4. Solve
-

🔑 Example 1:

Riya has 7 candies. She gets 6 more. How many now?

👉 “Gets more” means **Addition**

$$7 + 6 = 13$$

✅ Riya has **13 candies** now.

🔑 Example 2:

There are 14 balloons. 5 fly away. How many are left?

👉 “Fly away” means **Subtraction**

$$14 - 5 = 9$$

✅ 9 balloons are left.

2 Mixed Operations

Mixed Addition and Subtraction to 20

$\begin{array}{r} 5 \\ + 6 \\ \hline \hline \end{array}$	$\begin{array}{r} 10 \\ - 5 \\ \hline \hline \end{array}$	$\begin{array}{r} 9 \\ - 3 \\ \hline \hline \end{array}$	$\begin{array}{r} 7 \\ + 2 \\ \hline \hline \end{array}$	$\begin{array}{r} 4 \\ + 6 \\ \hline \hline \end{array}$
$\begin{array}{r} 3 \\ + 4 \\ \hline \hline \end{array}$	$\begin{array}{r} 1 \\ + 8 \\ \hline \hline \end{array}$	$\begin{array}{r} 14 \\ - 7 \\ \hline \hline \end{array}$	$\begin{array}{r} 4 \\ - 1 \\ \hline \hline \end{array}$	$\begin{array}{r} 2 \\ - 2 \\ \hline \hline \end{array}$
$\begin{array}{r} 9 \\ - 4 \\ \hline \hline \end{array}$	$\begin{array}{r} 8 \\ + 6 \\ \hline \hline \end{array}$	$\begin{array}{r} 16 \\ - 4 \\ \hline \hline \end{array}$	$\begin{array}{r} 12 \\ - 8 \\ \hline \hline \end{array}$	$\begin{array}{r} 10 \\ + 3 \\ \hline \hline \end{array}$
$\begin{array}{r} 11 \\ + 6 \\ \hline \hline \end{array}$	$\begin{array}{r} 15 \\ - 7 \\ \hline \hline \end{array}$	$\begin{array}{r} 14 \\ - 9 \\ \hline \hline \end{array}$	$\begin{array}{r} 7 \\ + 7 \\ \hline \hline \end{array}$	$\begin{array}{r} 9 \\ + 4 \\ \hline \hline \end{array}$

Ex 4.2, 4

Solve the following equations:

(g) $3s + 12 = 0$

$$3s + 12 = 0$$

Subtracting both sides by 12

$$3s + 12 - 12 = 0 - 12$$

$$3s = -12$$

Dividing both sides by 3

$$\frac{3s}{3} = \frac{-12}{3}$$

$$s = -4$$

4

◆ What are Mixed Operations?

When a question has **both + and −**, we solve **step by step from left to right**.

☛ Example:

$$12 - 4 + 3 = ?$$

$$\text{Step 1: } 12 - 4 = 8$$

$$\text{Step 2: } 8 + 3 = 11$$

✓ Answer: **11**

☛ Another Example:

$$15 + 2 - 5 = ?$$

$$15 + 2 = 17$$

$$17 - 5 = 12$$

✓ Answer: **12**

3 Fact Families

Number bonds

4

◆ What is a Fact Family?

A fact family shows how **3 numbers are related** using addition and subtraction.

If we know:

$$5 + 3 = 8$$

We can also write:

$$3 + 5 = 8$$

$$8 - 5 = 3$$

$$8 - 3 = 5$$

These 4 sums belong to the **same fact family**.

☛ **Example:**

Numbers: 4, 6, 10

$$4 + 6 = 10$$

$$6 + 4 = 10$$

$$10 - 4 = 6$$

$$10 - 6 = 4$$
