

Shapes

 Medium Level (Application Thinking)

1 Count the Sides of Shapes

 What are Sides?

Sides are the straight lines that make a shape.

Let us count:

 Circle → 0 straight sides

 Triangle → 3 sides

 Square → 4 equal sides

 Rectangle → 4 sides

 Example:

How many sides does a square have?

 Answer: 4 sides

 Practice:

How many sides does a triangle have? _____

Which shape has no straight sides? _____

2 Compare Shapes

 How Do We Compare Shapes?

We compare shapes by:

Number of sides

Number of corners

Length of sides

 Example Comparisons:

Square vs Rectangle

Both have 4 sides

Square → all sides equal

Rectangle → opposite sides equal

Triangle vs Square

Triangle → 3 sides

Square → 4 sides

🔑 Question:

Which shape has more sides — triangle or square?

✅ Answer: Square

3 Shapes in Real Life

◆ Shapes Around Us

Shapes are everywhere in our daily life.
