

Shapes

 Hard Level (Higher Thinking)

Introduction to 3D Shapes

 What are 3D Shapes?

3D shapes are solid shapes.

They have:

Length

Breadth

Height

We can hold and touch them.

 Cube

6 square faces

All sides equal

 Example: Dice, ice cube, gift box

 Sphere

Round shape

No edges, no corners

 Example: Ball, orange

 Cylinder

2 flat circular faces

1 curved surface

 Example: Can, water bottle

Which Shape Can Roll?

 Rolling and Sliding

Sphere → Rolls easily

Cylinder → Can roll and slide

Cube → Slides, but does not roll

 Example:

Which shape can roll?

✓ Answer: Sphere

3 Sorting Shapes

◆ What is Sorting?

Sorting means grouping shapes based on a rule.

◆ Sort by Number of Sides (2D shapes)

Group 1: 3 sides → Triangle

Group 2: 4 sides → Square, Rectangle

Group 3: 0 straight sides → Circle

▀ Example:

Group shapes by number of sides.

4 Build Patterns Using Shapes

◆ What is a Pattern?

A pattern is something that repeats in order.

◆ Example 1 (AB Pattern):

Circle, Triangle, Circle, Triangle...

◆ Example 2 (ABC Pattern):

Square, Triangle, Circle...

▀ Activity:

Continue the pattern:
