

Grade 2 – Measurement

● Advanced Level

1 . Length

Concepts:

- Adding and subtracting lengths (cm and m – basic introduction)
- Converting $100\text{ cm} = 1\text{ m}$ (introductory understanding)
- Solving word problems involving length

Examples:

1 . A rope is 45 cm long. Another rope is 38 cm long. What is the total length?
 $45\text{ cm} + 38\text{ cm} = 83\text{ cm}$

2 . A ribbon is 90 cm long. 25 cm is cut off. How much ribbon is left? $90\text{ cm} - 25\text{ cm} = 65\text{ cm}$

3 . $100\text{ cm} = 1\text{ m}$ So $200\text{ cm} = 2\text{ m}$

2 . Weight

Concepts:

- Solving word problems using kilograms (kg)
- Comparing and finding difference in weight
- Adding and subtracting weights

Examples:

1 . A watermelon weighs 6 kg and a pumpkin weighs 4 kg . What is their total weight?
 $6\text{ kg} + 4\text{ kg} = 10\text{ kg}$

2 . A bag weighs 9 kg . 3 kg of rice is removed. What is the new weight? $9\text{ kg} - 3\text{ kg} = 6\text{ kg}$

3 . Which is heavier and by how much? 8 kg or 5 kg Difference = 3 kg

3 . Capacity

Concepts:

- Solving problems using litres (L)
- Adding and subtracting capacity
- Comparing quantities of liquid

Examples:

- 1 . A tank contains 7 L of water. 3 L is used. How much water remains? $7\text{ L} - 3\text{ L} = 4\text{ L}$
- 2 . A jug has 5 L of juice and another jug has 6 L. What is the total amount? $5\text{ L} + 6\text{ L} = 11\text{ L}$
- 3 . Which holds more and by how much? 9 L or 4 L Difference = 5 L

4 . Mixed Word Problems

- 1 . A rope is 50 cm long. Another rope is 30 cm long. The total length is used to make 2 boxes equally. What is the total length? $50\text{ cm} + 30\text{ cm} = 80\text{ cm}$
- 2 . A container holds 8 L of milk. 2 L is poured out in the morning and 1 L in the evening. How much milk is left? $8\text{ L} - 2\text{ L} - 1\text{ L} = 5\text{ L}$
- 3 . A bag weighs 12 kg. Another bag weighs 7 kg. What is the total weight and the difference in weight? Total = 19 kg Difference = 5 kg

Skills Developed:

- Multi-step problem solving
 - Unit understanding and basic conversion
 - Logical reasoning
 - Real-life measurement application
 - Analytical comparison skills
-

Learning Outcome:

After completing Advanced Level Measurement, students can:

- ✓ Add and subtract measurements accurately
- ✓ Solve real-life word problems
- ✓ Compare quantities and find differences
- ✓ Understand simple unit relationships
- ✓ Apply measurement concepts in daily situations
