

Sunny, rainy, cloudy

Definition:

- **Sunny:** clear sky with lots of sunlight. **Rainy:** water droplets fall from clouds. **Cloudy:** sky covered with clouds with little or diffused sunlight.

Explanation:

- **Weather conditions change day to day. Clouds form when air cools and water vapor condenses. Rain happens when cloud droplets become heavy enough to fall. Explain how sunlight warms the Earth.**

Activity:

- **Weather picture cards and ask children to describe what clothes they'd wear in each weather.**
